Vascular Anomalies Clinic

WELCOME
The Vascular Anomalies Clinic at American Family Children's Hospital in Madison is a multidisciplinary clinic solely committed to providing expert care of infants, children, teens and adults with congenital vascular anomalies and syndromes including:

- Infantile hemangiomas
- Congenital hemangiomas
- Glomuvenous malformations
- Lymphatic malformations
- Venous malformations
- Capillary malformations / Port Wine Stain
- Klippel-Trenaunay Syndrome, Parkes-Weber Syndrome
- Arteriovenous malformations of head/neck, trunk and extremities
- PHACE Syndrome

AMERICAN FAMILY CHILDREN’S HOSPITAL
The Vascular Anomalies Clinic is located at American Family Children’s Hospital (AFCH), a state-of-the-art children’s medical and surgical center connected to University Hospital. Because these congenital anomalies are currently not curable, many children grow into adulthood and require continued care. Accordingly, young and older adults are also seen at American Family Children’s Hospital.

PREPARING FOR YOUR VISIT
To make your clinic visit more efficient, please make sure the following items are faxed to us at (608) 263-0440 in advance or that you bring them to your appointment:

- Pertinent medical records from your local doctor
- Any recent laboratory test results, X-ray or CT or MRI images
- Any pathology reports from biopsies or surgery
- A list of your or your child’s current medications
- Any necessary insurance information or referral

Please call (608) 263-6420 and press option #3 with any questions about preparing for your Vascular Anomalies Clinic appointment.

YOUR CLINIC VISIT
The Vascular Anomalies Clinic is part of the Pediatric Specialty Clinic, located on the 2nd floor of American Family Children’s Hospital. Patients who have never seen a physician at American Family Children’s Hospital must first register in Outpatient Registration. Please plan to arrive 20 minutes before your scheduled appointment to allow time for this.

Team members of the Vascular Anomalies Clinic will meet you and/or your child to determine the best care plan. Part of your appointment will include photographs. Our multidisciplinary clinic means you will see several specialists during this appointment.

—Continued on back
**CLINIC HOURS**
Fridays, 1:00 – 3:45 pm

To schedule an appointment, please call **(608) 263-6420**.

All specialists meet for discussion of you or your child’s individual needs and planned treatment. You, your primary doctor and other therapists and clinicians will receive a letter outlining our recommendations and plans.

**EDUCATION**
The Vascular Anomalies Team strives to provide patients and families with clear and comprehensive education regarding the diagnosis and proposed treatment. It is important that you feel you understand the discussion in clinic and are comfortable with the care plan that is made. Please also see uwhealthkids.org and diagnosis specific brochures for more in-depth information.
Vascular Anomalies Team

“Meet” your doctor before your appointment.
By going online to uwhealth.org/findadoctor, you can search for your doctor’s biography page. Many physicians also have a short video online in which they discuss their approach to care.
