

RE: _____

DOB: _____

To Whom it May Concern:

_____ is diagnosed with Type I insulin dependent diabetes mellitus. He/She is routinely followed in the Diabetes Clinic at University of Wisconsin Hospital and Clinics for ongoing care. It is a necessity that _____ carry the following supplies to manage their diabetes: insulin pump with catheter sets, insulin vials, insulin syringes, glucose meter, test strips, finger stick lancets, ketostix and a Glucagon Emergency Kit. In addition, he/she needs to carry foods and snacks to treat hypoglycemic (low blood sugar) episodes. These foods and snacks may include cake decorating gel tubes and juice boxes.

Sincerely,

American Family Children's Hospital
Pediatric Endocrinology and Diabetes
