

Does my child still need a booster seat?

Try the **5-Step Test** to find out:

This girl passes the 5-step test

- 1** Does the child sit all the way back against the auto seat?
- 2** Do the child's knees bend comfortably at the edge of the auto seat?
- 3** Does the belt cross the shoulder between the neck and arm?
- 4** Is the lap belt as low as possible, touching the thighs?
- 5** Can the child stay seated like this for the whole trip?

If you answered “no” to any of these questions, your child needs a booster seat to make both the shoulder belt and the lap belt fit right for the best crash protection. Your child will be more comfortable, too!
